

Rani Ali

Full-Stack Developer

ranigfx@gmail.com | 054-2453718 | [GitHub](#) | [LinkedIn](#)

SUMMARY

Full-Stack Developer with production experience across the JavaScript/TypeScript ecosystem (React, Next.js, Node.js) and hands-on AI engineering practice: integrating and evaluating LLM APIs (OpenAI, Anthropic, MiniMax, GLM, Kimi), building agent workflows with the Model Context Protocol (MCP), and applying prompt engineering to real applications. Independently designed, shipped, and maintains a live production tool with a steady daily user base. Background leading full-stack bootcamps for 25+ students. Proactive communicator with a strong self-directed learning track record.

TECHNICAL SKILLS

- **Languages & Frameworks:** JavaScript, TypeScript, Node.js, React, Next.js
- **AI / LLM Engineering:** LLM API integration (OpenAI, Anthropic, MiniMax, GLM, Kimi), Model Context Protocol (MCP), prompt engineering, context management, local AI agent setup; currently studying Retrieval-Augmented Generation (RAG)
- **Backend & Databases:** Express, PostgreSQL, Supabase, Turso, MongoDB, MySQL, Prisma ORM, Drizzle ORM
- **Styling & Tooling:** Tailwind CSS, Redux Toolkit, RTK Query, Zustand, Zod, Git, Docker
- **Other:** RESTful API design, Stripe payment integration

PROJECTS

Portfolio: [portfolio.ranigfx.dev](#) (in progress — compiling all projects, incl. ZeroTwo, FormAi)

Svarog Tracer — Creator & Maintainer | Independent Project | Live: [Demo](#) 2024 – Present

- Built and actively maintain a live game-analysis and prediction tool with custom calculation logic, engineered to trace, calculate, and surface high-confidence outcomes through a clean, accuracy-focused interface, applied to gacha-game systems (e.g., relic/upgrade mechanics) to model roll and pull outcomes.
- Sustains an active production user base — averaging ~10 daily users, spiking to ~40 during major game patch releases — with zero dedicated marketing.
- Stack: Vite, React, JavaScript, with an in-progress migration to TypeScript for stronger type safety across the calculation engine.
- Consolidated a second, related gacha-tracking tool into Svarog Tracer as a unified product rather than maintaining separate codebases.

PROFESSIONAL EXPERIENCE

Full-Stack / Frontend Instructor | Appleseeds2023 – 2024

- Led MERN stack bootcamps for 25+ students, delivering lectures and hands-on projects.
- Designed exercises, projects, and assessments to reinforce key development concepts.
- Taught MERN, TypeScript, Next.js, Redux Toolkit, RTK Query, and Tailwind CSS.

Independent Projects & Self-Study | Self-Directed2024 – 2026

- Dedicated this period to continuous feature development, optimization, and scaling of the live Svarog Tracer application to support active user growth.
- Built hands-on expertise integrating LLM APIs (OpenAI, Anthropic, MiniMax, GLM, Kimi), the Model Context Protocol (MCP), and local AI agents; completing the Complete Vercel AI Masterclass (Udemy) while actively expanding into RAG and vector databases.

Fullstack Developer Intern | SampleadJan 2023 – Apr 2023

- Integrated AWS services with Slack for real-time event notifications (DB, EC2, cluster alerts).
- Streamlined event-driven architecture using AWS EventBridge and Lambda functions.

Help Desk Tier 2 | Strauss Group2021 – 2022

- Provided software and hardware support across departments and documented issue resolutions.

EDUCATION & CERTIFICATIONS

Full Stack Developer Bootcamp | AppleseedsGraduated Apr 2023

- Intensive 6-month, 720-hour program covering front-end (HTML, CSS, JavaScript, TypeScript, React) and back-end (Node.js, MongoDB) development through self-led and group projects.

Computer Maintenance & Network Management (Sys Admin) | Hackeru — Microsoft MCSA CertificateSep 2022

ADDITIONAL

Languages: Arabic (Native) | Hebrew (Native) | English (Fluent)

National Service: Hapoel Tel Aviv Football Club — Youth football coaching (2012 – 2013)
